SUMMARY

Versatile software engineering student and frontend developer with professional experience building production ready interfaces using React, GSAP, and Three.js. I actively build backend projects and confidently consider myself a full stack developer. I have a strong passion for integrating AI/ML models and deep learning into the MERN stack to create intelligent applications. Currently deepening my expertise in advanced AI architectures by developing a Retrieval Augmented Generation (RAG) system for my final year project, seeking an entry-level role where I can contribute to impactful products while expanding my backend and AI skills.

SKILLS

- Frontend: React, JavaScript, TypeScript, Tailwind CSS, GSAP (animation), Three.js (3D web), Next JS
- Tools: Git & GitHub, Responsive design, REST APIs, Postman, Blender, VS code
- Backend (growing): Node.js, Express, Next JS, Mongo DB, PostgreSQL (Neon DB), basic full-stack app structure
- Core CS: Distributed Computing, Network Security, OOP, Machine and Deep Learning

EXPERIENCE

Junior Frontend Developer — KGT Global (Software House)

Mar 2026 – May 2026

- Built and maintained exact UI components from client web projects using React and JavaScript
- Fixed bugs and improved page responsiveness across different screen sizes
- Collaborated with the development team on day-to-day feature delivery on fixed time and code reviews

PROJECTS

PORTFOLIO (Next JS, GSAP, Three JS)

Fintech style website featuring immersive 3D visuals and scroll triggered animation. Showcasing all my 18+ projects I have worked on with full source code available on GitHub. [<https://syed-akbarali-portfolio.vercel.app/>]

GSAP Animation — Redefine Gaming Metaverse Concept (React, GSAP)

A futuristic metaverse concept page featuring scroll driven animation, polygon inspired values. [<https://redefine-gaming-tan.vercel.app/>]

GSAP Animation — SPYLT Product Landing Page (React, GSAP)

A scroll driven website paired with smooth scroll and dynamic typography/videography reveals. [<https://spylt-drink.vercel.app/>]

Three.js Project — 3D Keyboard Models (Next JS, Three.js)

3D keyboard model Integrate into website for user to explore and rotate. [<https://3d-keyboard-six.vercel.app/>]

Three.js Project — Minecraft Clone (React, Three.js)

A very basic first-person movement, moving and jumping physics. [<https://mini-minecraft-alpha.vercel.app/>]

Full Stack — MERN Auth (React, Node.js, Express, MongoDB)

Complete auth system login, signup, email verification, change password. [<https://mern-authentication-sandy.vercel.app/>]

Full Stack — Task Management (React, Node.js, Express, MongoDB)

Task management platform where you can login/signup and drag/drop cards across 3 categories (acknowledge, working, completed). [<https://task-manager-cheel.vercel.app/>]

Full Stack — Product Store (React, Node.js, Express, PostgreSQL)

Full featured e-commerce platform with complete AUTH, product creation (authenticated user only) and add comment on individual products. [<https://product-store-frontend-vert.vercel.app/>]

EDUCATION

Bachelor of Science, Software Engineering (BSSE) — University of Karachi

Expected 2027

- Relevant coursework: Distributed Computing, Software Process Management, Object-Oriented Programming, Machine and Deep Learning, Network Security
